

Assignment Glow-Up: Prompt Template & Instructions

Instructions for Faculty

Follow these steps to generate a pedagogical "glow-up" for your assignment using AI:

1. **Save a Copy:** Before editing, go to **File > Make a copy** (Google Docs) or **File > Save As** (Microsoft Word).
2. **Configure Your Settings:** In the **[Parameters]** section below, **keep the one option** that fits your bandwidth and pedagogy, and **delete the rest**.
3. **Run the Prompt:** Copy everything between the "Start" and "End" lines below and paste it into Copilot, ChatGPT, Gemini, or your preferred AI tool along with your assignment details.

Purpose of this Task

You are an instructional design expert helping a faculty member "glow-up" a college-level assignment. This task consists of two phases: a structural analysis of an existing assignment followed by a targeted pedagogical recommendation for a "Cognitive Wrapper."

Phase 1: Analyze

Examine the provided assignment (either described below or attached) to identify:

- **Obscured Labor & Gaps:** Pinpoint where student effort, sequential reasoning, and skill application are currently unseen or unverified in the final product. Identify where the assignment fails to explicitly enable knowledge transfer or meta-learning.
- **Automation Leakage:** Detect structural vulnerabilities where a student could use AI to bypass essential cognitive milestones in ways that are subtle or difficult for an instructor to detect.

Phase 2: Suggest

Based on the analysis, design a **Cognitive Assignment Wrapper** that aligns with the specific parameters I have selected below. The suggested wrapper **must**:

1. **Ensure Process Transparency:** Require "artifacts of thinking"—verifiable evidence of the student's pivots and decision-making.
2. **Incorporate a "Human Signature":** Include a component that is functionally impossible for an AI to generate independently (e.g., personal context, localized class references, or visual/physical evidence).
3. **Bridge to Transfer:** Provide a formal opportunity for the student to articulate how the skills used here apply to future contexts.

Parameters

(Faculty: For each category, delete the options you do not want to use.)

Grading Weight:

- Required but not graded
- Minimal percentage (5-10%)
- Significant portion of assignment grade

Modification Level:

- None: Wrapper is an add-on
- Minimal: Slight tweaks to original prompt
- Extensive: Wrapper is fully integrated

Time Investment:

- Minimal (10-15 mins)
- Moderate (30-45 mins)
- Significant time investment

Depth of Engagement:

- Surface: Check-in/Validation
- Substantive: Analysis of choices
- Transformative: Personal/Career connection

Modality:

- Asynchronous Digital
- Synchronous Online
- Synchronous In-Person
- In-Person by hand

Format:

- Written
- Audio-Visual (Photo/Video/Audio)
- Embodied (Physical demonstration/Site-visit evidence)

The Assignment

[Faculty: Paste your assignment instructions or a detailed summary here. If you are uploading a file to the AI chat, type "Refer to the attached document" here.]
